SIR:

Applicant and his counsel have carefully reviewed the Office Action dated June 16, 2006, but believe claim 1 in its present form is patentable over the teachings of the reference relied upon by the Examiner. Reconsideration of the application in view of the following arguments in support of patentability is therefore respectfully requested.

**R E M A R K S**

In the Office Action dated June 16, 2006, claim 1 was rejected under 35 U.S.C. §102(e) as being anticipated by Nachaliel et al. In substantiating this rejection, the Examiner stated, among other things, that the Nachaliel et al. reference discloses method steps including determining the depth position, in a subject, of a lesion using orthogonal lead fields. The Examiner cited column 3, lines 14-35 and column 20, lines 20-53 in substantiation of this statement.
